AttendWise

HACKATHON PROJECT BY TEAM AARARA

TEAM: ARSH JAIN, ADITYA RAJ, DWIJESH CHILUKURI

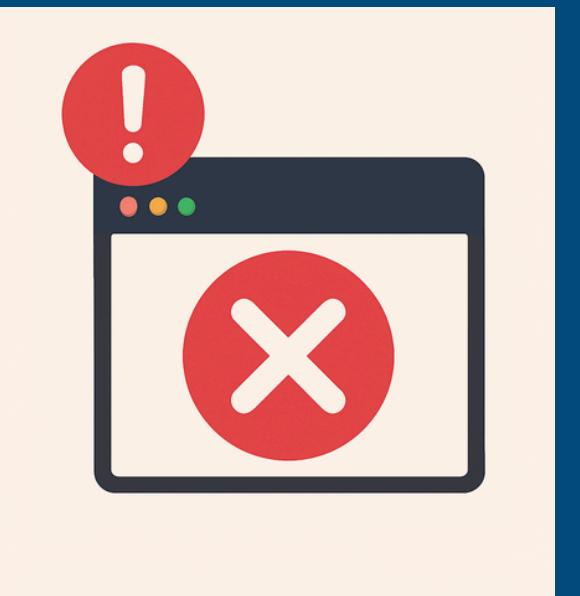

Problems solved by us:

An average of 5-10 minutes of valuable class time is lost every single day.

Manual entry and paper records lead to frequent mistakes and inaccuracies.

“Buddy punching” undermines the integrity and fairness of the entire system.

Administration have no immediate data to identify and support at-risk students

How do we solve the problem:

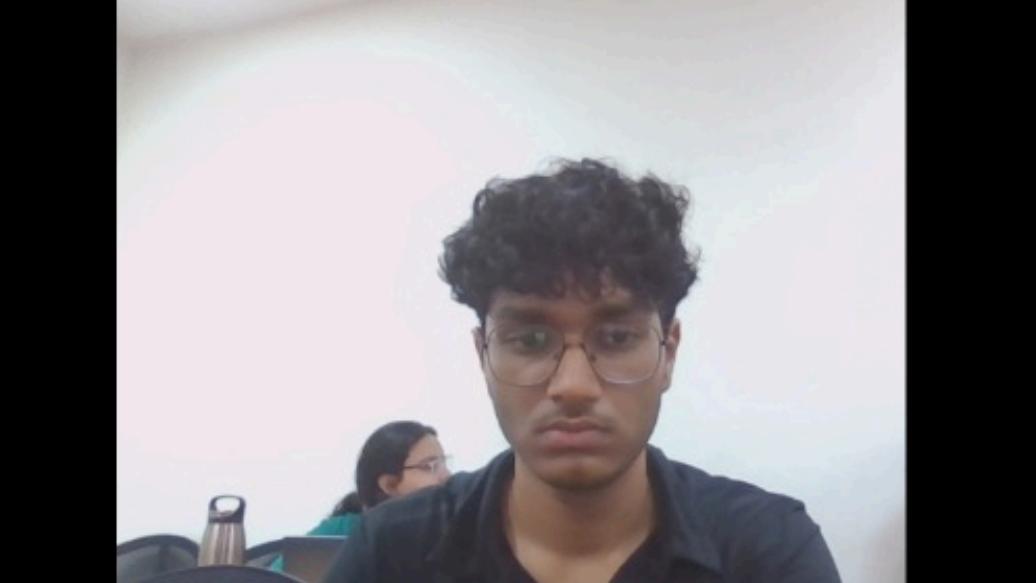

Our platform addresses the identified problem by creating a Student Dashboard that provides marking of attendance with face recognition. This approach streamlines the entire marking of attendance with this revolutionizing product
“AttendWise”

Dashboard:

 AttendWise

Live Classroom Feed

● Live Detection Active

Attendance Log

Current Status

1 / 7 students present.
